

Wind Power Website For Sale

Cambridgeshire, United Kingdom

£12,500

Wind Power UK is a company dedicated to helping the environment, by using wind power to stop emissions into the atmosphere from conventional power stations. The company was setup to supply information regarding wind power, and solar power, together with supply and installation of these units.

This Renewable Energy website which was established 2 years ago is now available for sale by the owner due to illness. The business has very limited trading history, but the website has the advantage of a high ranking on Google. There are currently four Google sponsored adverts which generate an income. This could be substantially increased with correct optimisation. There are a number of links to the site.
