FRANCHISE TERMS

These terms will be provided during initial discussions; this is a well respected International Franchise organisation with successful trading over 15 years and in 22 countries. The price of £57,625 includes £17,625 for training.

LOCATION

Expansion potential:The vast majority of existing franchisees have created very lucrative businesses; being entrepreneurs many are taking advantage of a newly developed model which enables the franchisee to take on an exclusive territory where they have the option of building a team of coaches. This enables the firm owners(s) to build a business asset and achieve significant company profits. Income streams are not just generated from face contact; the franchisor has created a large portfolio of printed and multimedia material which the franchisee has the rights to sell.
Competition / Market:There is limited specific competition, any competitive pressures will come from traditional consultancy firms who do not concentrate on business coaching and often employ outdated methods and philosophies. The business is a true world leader and that is represented by their dominance in the market.
Support & training:You will attend a 10 day intensive training course in Las Vegas which will give you step by step training that covers everything you need to learn. Once you return you will begin a 12 week kick start training course that will run concurrently with you setting up your practice; you will then receive regular training calls as well as regional, European and Global Conferences. You will also have access to your own personal coach and have access to the international ActionCOACH community which provides support, encouragement and access to empirical case studies.
