

Established and Successful Garden Machinery Business For Sale

Doncaster, South Yorkshire, United Kingdom

£45,000

A very long established and successful business specialising in the sale and repair of all types of garden machinery including petrol and electric lawnmowers, strimmers, hedge trimmers, blowers etc. Doncaster Garden Machinery are appointed agents for the ever popular market leaders Mountfield and Al-Ko, and offer their customers the full range of products and spares for these well known brands.

The business offers a full service and repair facility, with all work undertaken in the extremely well equipped on-site workshop. Our clients only provide their services for recognised brands of garden machinery, and have a number of regular local maintenance contracts, including Doncaster Council.

Here is a thriving and hugely successful business, now regrettably offered for sale due to the constraints of our clients' other business activities. The vendors also operate a thriving Mobility business from the same premises and are in the unusual position whereby they have two rapidly expanding businesses with the space, staff and facilities to successfully develop only one of their enterprises.

Due to space, time and personnel constraints, Doncaster Garden Machinery is in the regrettable position whereby it is necessary to turn away approximately 50% of the business offered, resulting in our clients' reluctant decision to market the business for sale, with the ultimate objective being to locate a purchaser with the ability to develop the business to its full potential.

This is a thriving and already very profitable business, offered for sale at what we consider to be an extremely realistic price by our clients, presenting the fortunate new owner with a rare and unusual opportunity to acquire a business with genuine potential for very significant further development.

Equipment:

The business utilises a range of specialist workshop equipment and tools including blade sharpening and grinding equipment, chain and shear grinding equipment, cleaning equipment etc., all of which is to be included within the sale price.

Stock:

The business typically has a wholesale stock holding of approximately £15,000.00, made up of retail machinery, spares and accessories. This stock will be in addition to the sale price, however there exists within the business a supply of useful older stock items which will be included within the sale price.

Please Note:

Our client was only able to trade limited hours during the year to 31.03.08 due to illness. It is clear to see the huge potential in the business from the turnover figures for the 5 months since April 2008.

LOCATION

The business currently trades from our clients' retail and workshop premises on Sandringham Road, but it will be necessary for the new owners to relocate the business to more suitable premises within the Doncaster/South Yorkshire area.
